

What is a welfare concern?

Overgrown and untrimmed feet

Horses, ponies, donkeys and mules (equines) require regular visits from the farrier to stop this from happening.

If you see an equine with overgrown hooves, please report them to us in confidence on **01427 789 369**, welfare@bransbyhorses.co.uk or at BransbyHorses.co.uk/horse-in-need

Hooves can curl upwards or grow long and flat causing damage to the internal structures.

Overgrown hooves that have curled up

Before

After

An equine's feet are called hooves

Correctly trimmed

Overgrown hooves cause pain and suffering

Overgrown hooves that have grown long and flat

Before

After

Correctly trimmed
