

BRANSBY HORSES
— Rescue and Welfare —

THIS IS TO CERTIFY THAT

has adopted **DOMINO**

ADOPTED ON _____

(expires one year from this date)

DOMINO

Donkeys are very special and often misunderstood. They are definitely not just ponies with long ears! Domino and his best friend Nero arrived at Bransby Horses together in 2009 and are still inseparable, never being far from each other whatever they're up to. Domino is prone to putting on weight and we have to watch his waistline for him as he does love his food! He knows that hay is delivered with a tractor and so every time he sees one he runs after it very enthusiastically!

Born: 1998

Size: 11.1 hands (4 inches to a hand)

Breed: Donkey

Likes: He loves ginger nuts and having his back scratched

Dislikes: Visits from the vets

DID YOU KNOW?

Donkeys do not have as much oil in their coat as horses and this means they need a rug or shelter in wet weather.

Visit Us

All Bransby Horses adoption animals live at our Lincolnshire Rescue Centre along with more than 300 horsey friends. The site is open to the public every day between **10am and 4pm** and **entry is completely free**. Although we try and keep all our adoption equines where visitors can see them easily, this isn't always possible so we advise people to ring ahead and check if you are planning to visit a particular animal.

Why not visit us on one of our three annual fayres? These are really fun packed events with lots of demonstrations, activities and a chance to meet your special adoption animal up close.
